PROFILE

Frontend developer and final-year Surveying and Geoinformatics Engineering student at the University of Lagos, with a Diploma in Frontend Development from AltSchool Africa. Builds responsive, accessible web applications with React, TypeScript and Tailwind CSS, from business websites to full booking platforms, and deploys them on Vercel. Seeking a frontend internship and open to collaborations.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React, React Router, React Hooks

Styling: Tailwind CSS, Responsive Design, Web Accessibility

Tools & Deployment: Git, GitHub, Vite, npm, VS Code, Figma, REST APIs, Vercel

PROJECT EXPERIENCE

QuickStay: Hotel Booking Web App | *React, Tailwind CSS, React Router*

[Live](#)

- Built a multi-page hotel booking platform with room listings, room detail pages and a bookings page, using React Router for client-side navigation.
- Developed an owner dashboard with nested routes and an Add Room form handling multi-image uploads with instant previews, room type, pricing and amenity selection.
- Created a room management table with per-room availability toggles managed in React state, in a fully responsive Tailwind CSS layout.

Personal Portfolio Website | *React, Vite, Tailwind CSS*

[Live](#)

- Designed and built a portfolio showing live, scaled previews of deployed projects that lazy-load with the IntersectionObserver API.
- Added technology-based project filters, a navbar that highlights the active section on scroll, and a Formspree contact form with loading, success and error states.
- Applied accessibility best practices, including a skip link, visible keyboard focus styles and reduced-motion support.

Movie Website | *JavaScript, HTML, CSS*

[Live](#) · [Code](#)

- Built a movie discovery site that lets users browse films through a clean, card-based interface.
- Used JavaScript DOM manipulation to render movie content dynamically, with a layout that adapts from mobile to desktop.

E-Commerce Website | *HTML, CSS*

[Live](#) · [Code](#)

- Developed an online storefront with a product showcase and shopping layout, using CSS Flexbox and Grid for consistent display across screen sizes.

EducateHer | *JavaScript, HTML, CSS*

[Live](#) · [Code](#)

- Built an education-focused web platform that presents learning content in a clear, accessible and responsive layout, with interactive elements written in JavaScript.

EDUCATION

University of Lagos

Expected 2027

B.Sc. Surveying and Geoinformatics Engineering

AltSchool Africa

2025

Diploma in Frontend Development
